

RAVEN Clinical Documentation Guide

If you suspect.... 

You will assess... 

And provide... 

Congestive Heart Failure

- Acute onset of dyspnea
- Orthopnea
- Paroxysmal nocturnal dyspnea
- New/increased leg or presacral edema
- Unexpected weight gain

Assessment

- Orientation
- Vital Signs
- Pulse Ox
- Weight
- Lung Sounds
- Cough
- Shortness of Breath (exertion or rest)
- Edema

Treatment

- Response to meds
- Oxygen
- Intake / Output
- Mobility
- Appetite
- Elimination
- Complaints/Comfort

- Response to meds
- Appetite
- Elimination
- Complaints/Comfort

Treatment

- Orientation
- Vital Signs
- Pulse Ox
- Lung Sounds
- Cough
- Shortness of Breath (exertion or rest)
- Oxygen Requirements
- Mobility

Assessment

- Productive cough
- Functional decline
- Increase
- Increased ADL dependence
- Reduced oral intake
- Increase lethargy
- Altered mental status
- Dyspnea

Pneumonia

COPD/ Asthma

- Wheezing
- Shortness of breath
- Increased sputum production
- Decreased oxygen saturation
- Increased oxygen demands
- Increased respiratory rate

Assessment

- Orientation
- Vital Signs
- Pulse Ox
- Lung Sounds
- Cough
- Shortness of Breath (exertion or rest)
- Mobility

Treatment

- Response to meds
- Oxygen
- Mobility
- Appetite
- Elimination
- Complaints/Comfort

RAVEN Clinical Documentation Guide

If you suspect.... 

You will assess... 

And provide... 

Pressure Ulcer / Cellulitis

- Pain
- Warmth
- Swelling
- Increased purulence
- Increased exudate
- Fever
- Induration

Assessment

- Orientation
- Vital Signs
- Description of Area
 - Size
 - Color
 - Drainage
 - Sensitivity
 - Movement
 - Skin integrity
 - Pain

Treatment

- Response to treatment
 - Antibiotics
 - Ointment
 - Dressing Changes
- Complaints/Comfort

- Response to IV fluids
- Elimination
- Complaints/Comfort

Treatment

- Orientation
- Vital Signs
- Orthostatic VS
- Weight
- Mobility
- Appetite
- Intake and Output

Assessment

- Decreased urine output
- Reduced oral intake
- Hypotension
- Orthostatic
- hypotension
- Abnormal lab values

Dehydration

Urinary Tract Infection

- Dysuria
- Frequency
- New incontinence
- Hematuria
- CVA tenderness

Assessment

- Orientation
- Vital Signs
- Mobility
- Appetite
- Elimination
- Intake and Output

Treatment

- Response to antibiotics
- Elimination
- Complaints/Comfort
